OUR OFFER FOR COMPOUNDERS: PRODUCE BIOPLASTICS TODAY

GUILTFREEPLASTICS® are the next generation of starch-based bioplastics with properties that open new markets and applications for bioplastics. Technically they can replace 90% of today's polyethylene applications. And with up to 90% renewable content, 100% recyclability, and 100% biodegradation as an added end-of-life option, they allow consumers to "enjoy plastics guilt-free".

The bioplastics market is growing with 20%+ each year, and starch-based bioplastics are judged to be the most cost effective production methodology. But it is hard for new players to enter, as key technologies are blocked by patents and

developing new ones is time consuming and costly. Our business model of licensing our BIOPAR® Technology breaks this conundrum as it provides compounders with "Instant market access" and a "license to operate".

TYPES OF LICENSES

You have the choice between two types of licenses: A BIOPAR® Compounding License or a BIOPAR® Technology License. It really depends on who you are, what you want to do (only produce or also innovate), and naturally your investment appetite.

TYPE	BIOPAR® COMPOUNDING LICENSE	BIOPAR® TECHNOLOGY LICENSE
WHAT DOES IT ALLOW ME TO DO?	To produce pellets for bio-based and biodegradable plastics or hybrids (based on and limited to existing formulations)	To not only produce but also to innovate and register your own intellectual property
HOW DOES IT WORK?	We will supply you with BIOPAR® Ready-mix Powder, show you how it works, and you only add a co-polymer and plasticiser.	In addition, we will open our books and share some of our secrets. We will provide you with a BIOPAR® Ready-mix Powder customized to your needs
WHO IS IT FOR?	Ideal for plastic compounders who want to sell bioplastics instantly	Aimed at larger compounders with their own R&D, starch manufacturers, or polymer producers

WHAT IT ENTAILS

Regardless of which license you choose, we're here to help. Working with you in partnership, we want to ensure that brand owners and retailers have access to high quality bioplastics.

THE TABLE SHOWS HOW WE CAN SUPPORT YOU:		
KNOW HOW TRANSFER	BIOPAR® COMPOUNDING LICENSE	BIOPAR® TECHNOLOGY LICENSE
Production methodology	●	●
Concept and technology	○	●
Training course + materials	●	●
Marketing support	●	●
Sub-licenses of biodegradation certificates	●	●
Access to Bioplastics Innovation Centre	○	●
Member of BIOPAR® Innovation Circle	○	●
